heavy vault-like
doors

54" - still getting anything
but a storage area - old
records, stacks of boxes.

Cabinets

Site is near a large city - but is in a more isolated area away from the city (commuting distance). Large complex. There is a "militaristic" feeling to the complex - based more on attitudes and demeanor of people. People there are not in military uniform. Bldg. is administrative in nature - reception area, offices, conference room/auditorium, and a 5th floor that is perceived as a storage area with large heavy vault-like doors. Feeling that is very free, prof. It has a musty smell. Large numbers of records are maintained - deal with people and contain personal information. Some of the records are very old. (See Break - IRR area). Personal history files. See Break - Chernobyl victims.

People are from select segments of society - political
leftists. ← AM
AM ~~also~~ Cochran

Political this - people who have "disappeared".
Possibly political personnel and families.
Keeping track.
